Premium Visibility Solutions
for demanding maritime and offshore use

The Luminell Group is passionate about delivering critical light solutions for demanding use, creating the industry standard in marine lighting, and establishing supportive and lasting relationship with its customers, staff and the community at large.

The Luminell series of solutions offer powerful lighting, outstanding functionality, provide increased safety, and a longer than average lifetime of use despite the strain of extreme environments. Our LED light solutions also boast an average 80% decrease in energy output, decreasing your environmental footprint. It is clear why the Luminell range of lights have become the first choice for many shipyards, ship designers, government bodies, rigs and vessels carrying out hazardous and important work.

The Luminell Group has offices in Norway, Sweden and the USA, where all Luminell products are proudly Scandinavian designed and manufactured and sold globally. Challenging the established,
pushing the known boundaries of design and technology, and a sincere desire to help its users, has been, and is still the drive behind Luminell. Experience the Luminell difference today.

Our team are ready to assist in finding the best solution for you!

Powerful LED floodlights for extreme environments

- Flicker Free
- Made to handle shocks and vibrations over time
- Seawater resistant and ”easy clean” design
- No maintenance
- Designed and produced in Scandinavia
- Dimmable
- Compact, robust and sealed
- Excellent EMC characteristics
- Encapsulated internal electronics
- No ballast required
- Available for hazardous areas
- Corrosion class C5m

Zone 1 & 2 LED floodlights for extreme environments

luminell®
Light Matters

Photo: Geert-Jan van Hest

- ATEX and IECEx approved. Zone 1, 2, 21 and 22
- Powerful light performance
- Compact and low weight
- Designed to be appreciated by the installer and the end user
- Wide operating temperatures
- Temperature classes T6/T5/T4/T3
- Extreme lifetime
- Light efficiency up to 80% from conventional lighting
- No flame path, no maintenance
- MIL-STD-461, excellent EMC/EMI characteristics
- Crafted for demanding marine and offshore conditions

"This is the best bowlight I've ever seen. I see waves and objects in the water on very long distance – it's simply amazing!"

Capt. Eldar Giske, M/S Ekspressen – Norled AS

The BLX™ Bowlight is designed to improve the ability to see during navigation and maneuvering at night. By combining the proven technology of the RLX Series with the practical testing of the optical features, Luminell has created a powerful Bowlight which will increase safety and endure, despite relentless and very harsh environments.

Key Features

- Detects bouy reflex on 1 NM
- Dimmable
- BLX™ design – compact, sealed and highly resistant to shock and vibrations
- Proven endurance
- Available in 24VDC and 100-277VAC
- Maintenance free
- Instant light
- Easy to clean design

5 YEAR WARRANTY

SLX™
SEARCHLIGHT

luminell®
Light Matters

The SLX™ Searchlight module is created to push limits and maximize the potential of LED technology and optical performance.

Luminell SLX™ 220W LED Searchlight.
Distance: 257 meters.

«This is a perfect light for us! Regarding light beam, power and range there is nothing to complain about! The light always works and it gets a lot of beating in the rough Northern-Sea, with our small vessel traveling at 30 knots.»

Asbjørn Thomassen, RS-138 (Search and rescue Vessel)

5 YEAR WARRANTY

Key Features

- Instant light
- No maintenance
- Upgrade your searchlight with different bracket kits available
- One or two different beam types per SLX™ module
- Very even light distribution
- Dimmable – perfect in snow, fog or similar conditions
- Compact, sealed and resistant to vibrations and shocks
- Available in 24VDC and 100-277VAC
- Proven endurance

The SLX™ Series LED searchlight module is made to replace conventional searchlight modules, increase light performance and eliminate costly and annoying maintnance. It is crafted to give superior value to the user with a powerful, compact and durable design, giving you the best return on investment possible.

The SLX™ searchlight module will enable you to detect an object at a distance of up to 2,600 meters away, depending on the chosen beam type for your needs.

The SLX™ is made to be mounted or fixed to suitable, existing movable platforms. Adapter bracket kits for certain movable searchlight platforms can also be delivered with your SLX™ searchlight module.

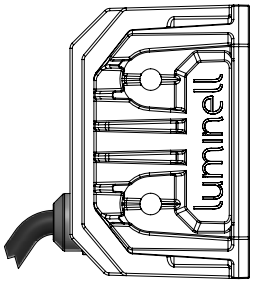
Our team are ready to take your requests and questions, so that your SLX™ searchlight can start making a real difference for you.

When safety at sea matters, Light Matters!

Input Specifications

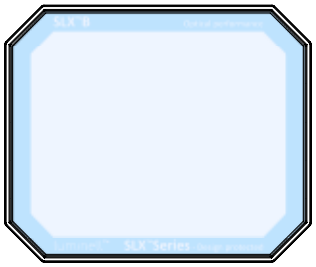
SLX™ Module

Input voltage range	9-36 VDC
Alternative voltage rang	100-277 VAC (external PSU)
Frequency range	50-60 Hz
Current @ 24 VDC	1,6A/3,2A
Current @ 230 VAC	0,2A/0,4A
DIM	Not dimmable



General Specifications

Startup time	1 sec.
Operating ambient temperature (Ta)	-40°C to +55°C
Storage temperature	-40°C to +80°C
Weight (apx.)	1,2kg
Weight external PSU (apx.)	1x1kg or 1x2kg
Cable gland	Fixed and moulded 3m 2x1,5 cable
Blind caps	None
IP class	IP66/67
Lifetime prediction (L70) @ Ta 25˚ C	75.000 hrs
Corrosion class	C5m ISO 9223/12944 (for offshore and maritime environments)

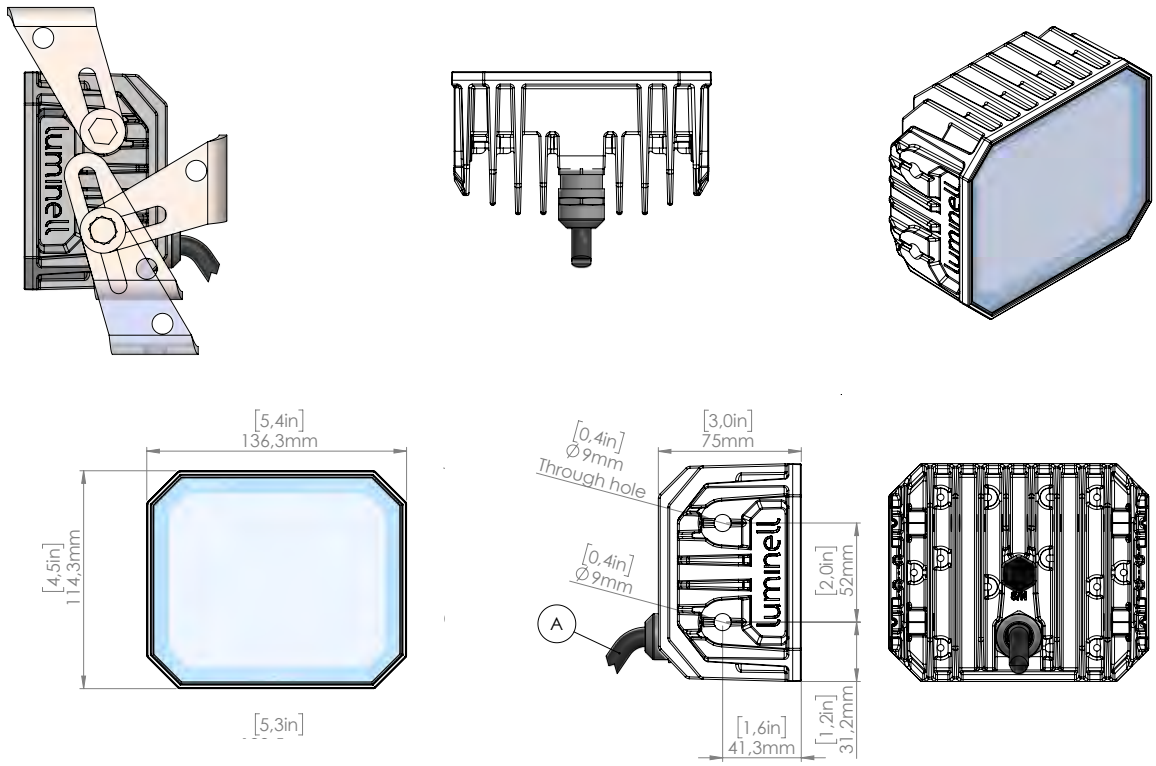


3,5° beam or 15° beam

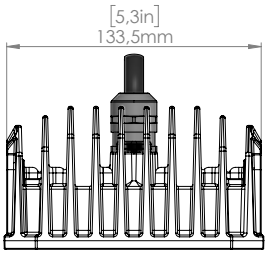
Product	SLX B 40WDC1 5K	SLX B 80WDC1 5K
Model no.	L0525-1	L0525-2
Light beam angle	3.5°	15°
Total intensity Cd	400kCd	80kcd
Range (1 lux/0,25 lux)	630m / 1265m	280m / 565m
Color rendering (CRI)	70 (min.)	70 (min.)
Color temperature (CCT)	5000-6000K	5000-6000K
Power	40W	80W
Optional AC PSU Acc.	1xS0093 (max 2 SLX B/PSU)	1xS0093 (max 2 SLX B/PSU)
Comments:	1xS0117 (max 3 SLX B/PSU)	1xS0117 (max 3 SLX B/PSU)
	1x power input 1x PSU is needed for AC installations If the SLX is powered using an external VAC power supply the used power will increase by approx. 10%.	

.

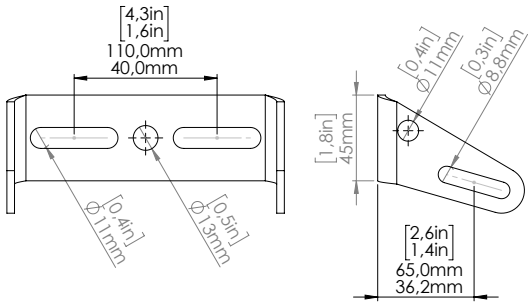
Multiple mounting options for optional bracket



A Supplied with 3m 2x1,5mm2 permanently fixed cable.



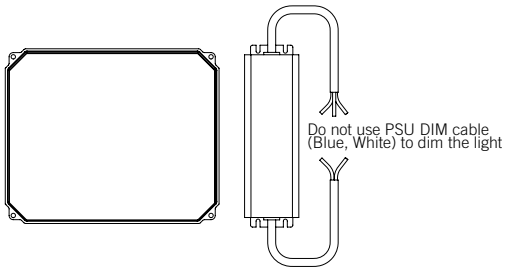
OPTINAL BRACKET: 1002613 L0570 B MARINE BRACKET SET	
Component:	**Qty.**
L0489 RLX B Bracket	1
S0023 M8x25 DIN 933 ISO 4017 A4 Hex Cap Screw	2
S0043 M8 DIN 985 ISO 7040 A4 Lock nut wNylon	2
insert S0185 8,4 DIN 9021 ISO 7093 A4 Flat washer	4



Input Specifications

SLX™ Module

Input voltage range	22 – 30 VDC
Alternative voltage range	100 – 277 VAC (external PSU)
Frequency range	50 – 60 Hz
Current @ 24 VDC	< 6,25 A
Current @ 230 VAC	< 0,7 A
DIM	0-100 kΩ or 0-10VDC



General Specifications

Startup time	1 sec.
Operating ambient temperature (Ta)	- 40˚C to + 55˚C
Storage temperature	- 40˚C to + 80˚C
Weight (apx.)	5 kg
Weight external PSU (apx.)	1 x 1 kg
Cable gland	2xM20 (6-13mm)
Blind caps	None
IP class	IP66/67
Lifetime prediction (L70) @ Ta 25˚ C	75.000 hrs
Corrosion class	C5m ISO 9223/12944 (for offshore and maritime environments)
Cable lenghts	Recommended cable length between 24VDC PSU and SLX™ C is 20m (150W per section). Specified lenghts are applicable with use of 2,5mm2 cross section supply cable.This is a general recommendation. It is the installer´s responsibility to assess this on each installation.

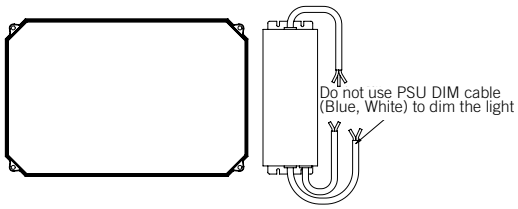
4° beam or 6+° beam

Product	SLX™ C 24V 4	SLX™ C 24V 6
Model no.	L0210-1	L0210-2
Light beam angle	4°	6+°
Total intensity Cd	875 000 Cd	875 000 Cd
Range (1 lux/0,25 lux)	935m / 1870m	935m / 1870m
Color rendering (CRI)	70 (min.)	70 (min.)
Color temperature (CCT)	5000-8000 Kelvin	5000-8000 Kelvin
Power	105 W	150 W
Optional AC PSU Acc.	1x S0093	1x S093
Comments:	- 1x power input - 1x PSU is needed for AC installations - If the SLX™ is powered using an external VAC power supply the used power will increase by approx. 10%.	

Input Specifications

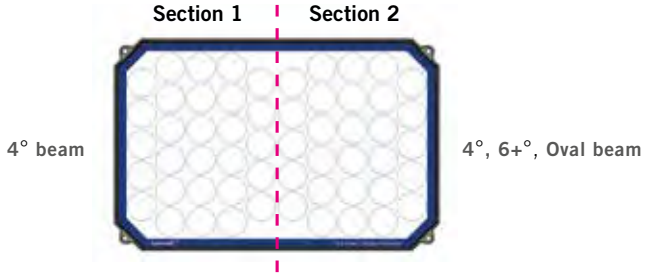
Input voltage range	22 – 30 VDC
Alternative voltage range	100 – 277 VAC (external PSU)
Frequency range	50 – 60 Hz
Current @ 24 VDC	< 10,7 A
Current @ 230 VAC	< 1,1 A
DIM	0-100 kΩ or 0-10VDC

SLX™ Module



General Specifications

Startup time	1 sec.
Operating ambient temperature (Ta)	- 40˚C to + 55˚C
Storage temperature	- 40˚C to + 80˚C
Weight (apx.)	8 kg
Weight external PSU (apx.)	1 x 2 kg
Cable gland	2xM20 (6-13mm)
Blind caps	None
IP class	IP66/67
Lifetime prediction (L70) @ Ta 25˚ C	75.000 hrs
Corrosion class	C5m ISO 9223/12944 (for offshore and maritime environments)
Cable lenghts	Recommended cable length between 24VDC PSU and SLX™ D is 15m (255W per section). Specified lenghts are applicable with use of 2,5mm2 cross section supply cable.This is a general recommendation. It is the installer´s responsibility to assess this on each installation.



Product	SLX™ D 24V 4/4	SLX™ D 24V 4/6	SLX™ D 24V 4/Oval
Model no.	L0084-1	L0084-2	L0084-3
Light beam angle (Section 1/2)	4°/4°	4°/6+°	4°/Oval H
Total intensity Cd	1,75 mCd	1,75 mCd	0,950 mCd
Range (1 lux/0,25 lux)	1322m / 2645m	1322m / 2645m	975m / 1950m
Color rendering (CRI)	70 (min.)	70 (min.)	70 (min.)
Color temperature (CCT)	5000-8000 Kelvin	5000-8000 Kelvin	5000-8000 Kelvin
Power	210 W	255 W	255 W
Optional AC PSU Acc.	1x S0117	1x S0117	1x S0117
Comments:	- 2x sections linked together - 1x power input - 1x PSU is needed for AC installations	- 2x sections, each controlled separately. - 1x power input - 1x PSUs is need for AC installations - Control panel is highly recommended!	
	- If the SLX™ is powered using an external VAC power supply the used power will increase by approx. 10%.		

Materials

Body / casing / chassis	Seawater resistant; casted, anodized and powder coated aluminium
Glass	Tempered glass
Bracket, bolts, nuts, etc.	Stainless steel AISI 316L (1.4404), A4

Standards for SLX™ Searchlight

Description	**Standard**
LED modules for general lightning	EN 62031:2008/A1:2013/A2:2015
Photo biological safety of lamps and lamp systems	EN 62471:2008
EMC radiated and conducted	EN 55015:2013 and MIL-STD461F/G Navy Top Deck
EMC marine radiated and conducted (using screened cable)	EN/IEC 60945:2002
ETL / cETL certified	ANSI/UL1598, ANSI/UL1598A, ANSI/UL 8750 and CSA C22.2 No.250.0 (not SLX B)

SL1 – Searchlight

General specification

IP class	Searchlight IP66 Operator panel IP56
Operating temperature	Searchlight -40°C to +55°C* Operator panel -20°C to +55°C
EMC	Designed for IEC 60945
Vibration/shock	Designed for IEC 60945
Materials	- Searchlight body in seawater resistance aluminum, anodized and powder coated. - Searchlight mechanical hub in acidproof stainless steel. - Tempered front glass. - Operator panel made in PC-ABS.
Colours	- The searchlight body comes in 3 colour versions: - White RAL 9016 gloss level 70 - Matt Jet Black RAL 9005 gloss level 20 - Matt Light grey RAL 7035 gloss level 20
Electrical interface to vessel	- DC power 3 wires (+/-/earth) - Ethernet for operator control panel
Mechanical interface to vessel	4 x threaded rod M8 in the searchlight mechanical hub. Sealing between vessel and searchlight mechanical hub for galvanic insulation (and to avoid water ingress in wheelhouse).
Static size and weight	19 x 40 x 42 cm, 18 kg
Optional hardware	- Side entry connection adaptor (Q3 2019) - Stray light reduction shield (Q3 2019) - Integration Unity Hub (Q3 2019)

**Temperature monitored LED for increased lifetime. Reduced light effect at higher environmental temperatures*

CL25
SEARCHLIGHT

Powerful and compact HID searchlight

'My own experience has been very good with the searchlight. It works great in the dark. But even in rain and fog, the results are excellent. The blacklight works great, too. We use the searchlight every night. It's dark here from 22:30 until 04:00 in the morning. We have to cope with a great many icebergs, 'bergy bits' and 'growlers.' The searchlight is definitely a necessary part of the equipment that we need here in order to operate under these conditions.'

Captain of the S/Y 'Rembrandt van Rijn.

A Searchlight – but also much more. Improving Light at Sea

APPLICATIONS:	Search and Rescue, Navigation support, Ice navigation support, Work light, Security surveillance, Oil spill illumination (UV)
TYPE:	HID light source with adjustable beam width
INPUT POWER:	100-240 VAC, 50/60 Hz
PAN/TILT:	Motorised with endless rotation in horizontal and vertical direction
KEY FEATURES:	Low EMC, unlimited movement, daylight characteristics, maintenance free operation, combination UV/IR/ HMI/LED light possibility, long range illumination

PART DESCRIPTION	PART NO	NOTE
Searchlight model CL25-11 400W/400W	CLS-25011	Also available in hanging version
Searchlight model CL25-12 400W/UV	CLS-25012	Also available in hanging version

There is a variety of other combinations on the CL25 platform, ask us for more information

OUTPUT / PERFORMANCE	
Range with 1 lux at target	3 200 m
Light beam angle	Adjustable 4-20°
Color Rendering (CRI)	90 Ra minimum
Color Temperature (CCT)	6000 K
Lumen (lm)	66 000 lm
Candela (Cd)	10,7 MCd measured

KEY TECHNICAL INFORMATION
Stainless steel in critical structural parts
Powder coat white RAL 9016
IP66
Operating temp -40/+70
Bulb lifetime up to 1 000 hours

INPUT INFORMATION
Mains power 100-240 VAC, 50/60 Hz, 1070W, 4,7 A @ 230 VAC (max load)
CAN bus / signal cable 3x2x1 shielded, twisted pair (between searchlight and electrical cabinet)
5G1,5 shielded power cable (between searchlight and electrical cabinet)
For electrical control box and operator panel data, see separate information

CL35IR
SEARCHLIGHT

Powerful HID searchlight with integrated thermal camera

A Searchlight – but also much more. Improving Light at Sea

APPLICATIONS:	Search and Rescue, Navigation support, Ice navigation support, Work light, Security surveillance, Oil spill illumination (UV)
TYPE:	HID light source with adjustable beam width as well as integrated thermal imaging system.
INPUT POWER:	100-240 VAC, 50/60 Hz
PAN/TILT:	Motorised with endless rotation in horizontal and vertical direction
KEY FEATURES:	Low EMC, unlimited movement, daylight characteristics, maintenance free operation, combination UV/IR/ HMI/LED light possibility.

PART DESCRIPTION	PART NO	NOTE
Searchlight model CLIR35-11 HID 575W/ 575W with IR cam, 336 res, 25 mm lens	CLS-35026	Also available in hanging version
Camera core upgrade to 640 res, 25 mm lens	CLN0530	
There is a variety of other combinations on the CLIR35 platform, ask us for more information		

OUTPUT / PERFORMANCE	
Range with 1 lux at target	5 300 m
Light beam angle	Adjustable beam 3-20°
Color Rendering (CRI)	90 minimum
Color Temperature (CCT)	6000 K
Lumen (lm)	98000 lm
Candela (Cd)	28,7 MCd measured

KEY TECHNICAL INFORMATION
Stainless steel in critical structural parts
Powder coat white RAL 9016
IP66
Operating temp -40/+70
Bulb lifetime up to 1 000 hours
For IR cam details, see separate pages in this catalogue.

INPUT INFORMATION
Mains power 100-240 VAC, 50/60
CAN bus / signal cable 4x2x1 shielded, twisted pair (between searchlight and electrical cabinet)
5G1.5 shielded power cable (between searchlight and electrical cabinet)
For electrical control box and operator panel data, see separate information

SEARCHLIGHT

Our most powerful HID searchlight with integrated thermal camera

A Searchlight – but also much more. Improving Light at Sea

APPLICATIONS:	Search and Rescue, Navigation support, Ice navigation support, Work light, Security surveillance, Oil spill illumination (UV)
TYPE:	HID light source with adjustable beam width as well as integrated thermal imaging system.
INPUT POWER:	100-240 VAC, 50/60 Hz
PAN/TILT:	Motorised with endless rotation in horizontal and vertical direction
KEY FEATURES:	Low EMC, unlimited movement, daylight characteristics, maintenance free operation, combination UV/IR/ HMI/LED light possibility.

PART DESCRIPTION	PART NO	NOTE
Searchlight model CLIR38-11 HID 800W/ 800W with IR cam, 336 res, 25 mm lens	CLS-38026	Also available in hanging version
Camera core upgrade to 640 res, 25 mm lens	CLN0530	
There is a variety of other combinations on the CLIR38 platform, ask us for more information		

OUTPUT / PERFORMANCE	
Range with 1 lux at target	6 100 m
Light beam angle	Adjustable beam 3-20°
Color Rendering (CRI)	90 minimum
Color Temperature (CCT)	6000 K
Lumen (lm)	130 000 lm
Candela (Cd)	38,1 MCd measured

KEY TECHNICAL INFORMATION
Stainless steel in critical structural parts
Powder coat white RAL 9016
IP66
Operating temp -40/+70
Bulb lifetime up to 1 000 hours
For IR cam details, see separate pages in this catalogue.

INPUT INFORMATION
Mains power 100-240 VAC, 50/60
CAN bus / signal cable 4x2x1 shielded, twisted pair (between searchlight and electrical cabinet)
5G2.5 shielded power cable (between searchlight and electrical cabinet)
For electrical control box and operator panel data, see separate information

CL series system overview

SEARCHLIGHT

Our searchlight system can be set up with different levels of complexity - from our Basic Solution to a more advanced control integration. The most important factor is that you as a customer recieve the right solution for your needs, improving light at sea. One important thing to note is that our systems are expandable - easy to upgrade and add further solutions and functionality.

The Basic Solution

The Luminell Basic Solution setup contains a searchlight, electronic control box and an operator panel; an effective and straight forward setup. Place the searchlight in a position which allows the light beam to reach as much area as possible around your vessel. Next place the electronic control box in an appropriate environment, and finally place the operator panel where it suits the operator best.

We also have a software upgrade available, Package 2 (Sweep, fixed positions, surveillance) increasing automatic operations and simplifying your work.

Customized control solutions

We have developed more simplified, one button control function, which can be driven by specific customer demands.

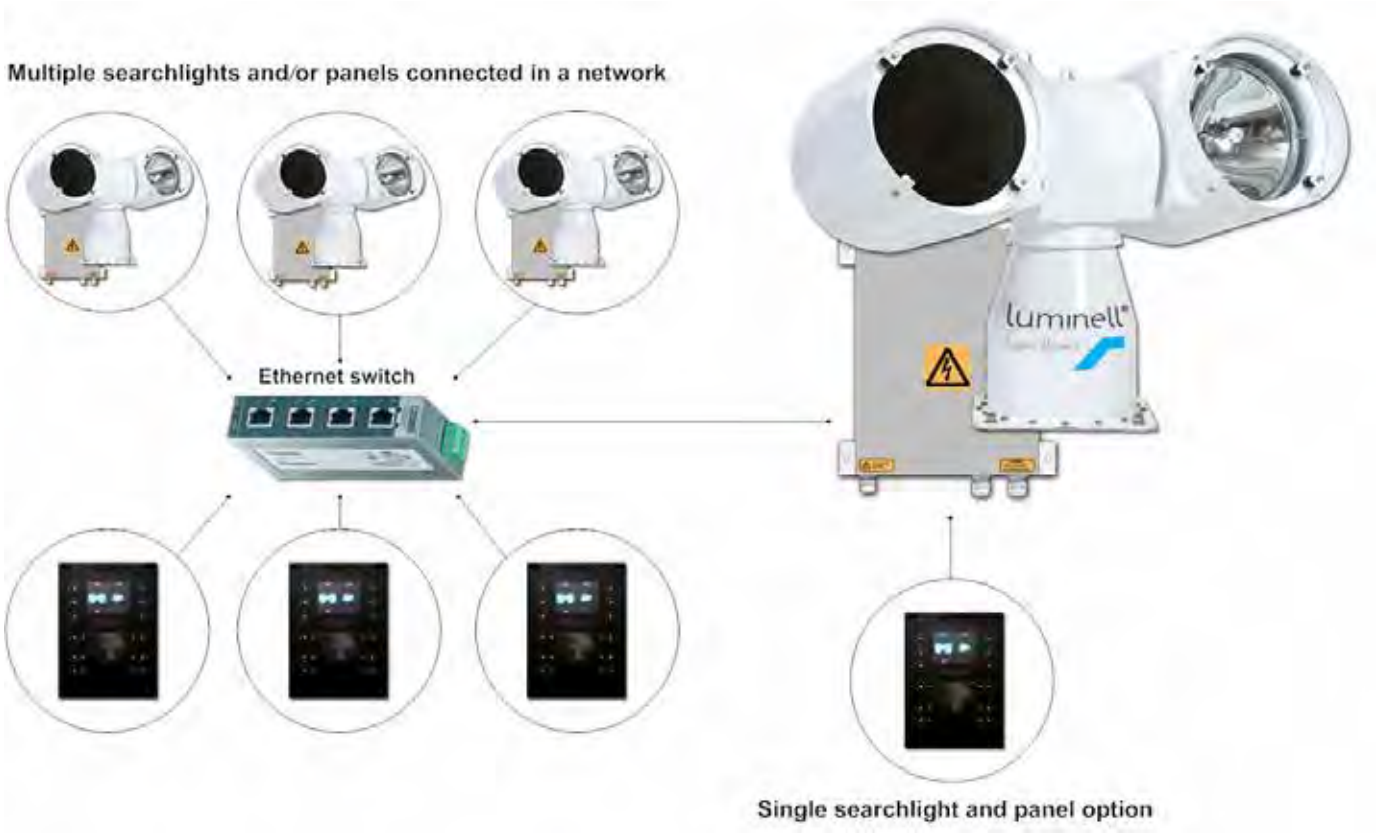
Helideck control button – press the allocated button and the searchlight lights up and goes to a pre-set position.
Press the button again – the searchlight lights off and goes back to a park position.

Another example is the solution RHOTHETA Radio Detection Finder control integration.

Press the allocated button, the searchlight lights up and follows the NMEA-output of the RHOTHETA Radio Detection Finder, most likely picking up the radio signal from the MOB beacon and defines the bearing from the vessel to a man or a vessel in distress. If you focus your light on the SAR operation, the searchlight will automatically follow and illuminate the target.

The Network Solution

The Network Solution contains multiple searchlights in combination with one or many operator panels. It connect all units with an Ethernet Switch and can access any system in the network from any control panel. A suitable software upgrade is our Package 3, which gives you synchronised control of multiple searchlights - where one or more searchlights will follow a master searchlight, increasing light power, and giving you the ease of simplified control by operating only one operator panel. Luminell can also create a block schematic solutions diagram, giving you an overview of your desired network.



Customized control solutions

We have developed more simplified, one button control function, which can be driven by specific customer demands.

Helideck control button – press the allocated button and the searchlight lights up and goes to a pre-set position.
Press the button again – the searchlight lights off and goes back to a park position.

Another example is the solution RHOTHETA Radio Detection Finder control integration.

Press the allocated button, the searchlight lights up and follows the NMEA-output of the RHOTHETA Radio Detection Finder, most likely picking up the radio signal from the MOB beacon and defines the bearing from the vessel to a man or a vessel in distress. If you focus your light on the SAR operation, the searchlight will automatically follow and illuminate the target.

Control Integration Solutions

Our systems have been developed for the easy intergration of both basic an advanced controls.

The electronics and the control software are well designed for one-man bridge solutions, as well as defined single button control functionality.

A good example of a more advanced integration is when functionality and control into the vessel's bridge and security system is made, by using input from Radar, GPS, AIS and other targets to define the manoeuvring of the searchlight. In this instance it is up to your requirements and the creativity of the system integrator to determine whether or not you fully utilise the full potential of our systems.
Many bridge system integrators have already integrated with our products. Should you wish to learn more about this, we'd be happy to provide you with references.

To simplify the integration of multiple searchlights, or to add the CL internal LAN network to the vessel's LAN system, we have developed an Integration Gateway. The Integration Gateway is a gateway and a single access point to a network of multiple searchlights – simplifying external control integration from a single controller or from a LAN network. Additionally it is also a programmable computer, making it possible for Luminell to offer the development of customised control functions as an optional feature.

CL series system overview

SEARCHLIGHT

Thermal camera solutions integrated in our searchlights – CLIR/SL2IR

The thermal night vision camera unit from FLIR® is placed into a robust, modern designed housing and mounted on top of the searchlight's middle-section. This means that the camera always follows the searchlight's horizontal movement from the joystick. The thermal camera is mounted in a special tilt unit which makes it easy to adjust the camera vertically from the operator panel.

The front section of the unit features a germanium window with an integrated temperature-controlled and self-regulating heating element.The element prevents condensation and ice build-up on the front window that could otherwise disrupt the camera's line of sight. The infrared thermal camera provides a clear picture based on temperature differences, even in complete darkness. This is possible as the camera is sensitive to thermal infrared radiation.

All objects with a temperature over the absolute zero point -273 C (0 degree K) generates infrared radiation. The hotter the temperature, the more infrared radiation. The IR sensor also senses differences of the material's emissivity, reflection and transmission. *Emissivity being the material's capability to emit infrared radiation, Reflection being the material's capability to reflect infrared radiation and Transmission being the material's capability of transmitting infrared radiation.*
Materials with a temperature over -273 C will be detected by the thermal sensor and different materials with same temperature will appear different on the monitor due to the different properties in the materials. The vulnerability of having an uncooled thermal sensor is that rain, fog or snow can reduce the optical sight and can also effect the range of IR detection. Depending on distance, the size of the object and the level of temperature (IR radiation) there is no simple answer as to how much the detection range is affected – (nevertheless it is affected).

Luminell work primarily with two alternative sensor resolutions; our standard version is a 336 core with a 25 mm focal lens, with an optional upgrade to a 640 core with 25 mm lens. The upgrade improves the resolution with an extended detection range and field of view.

A combined solution with a thermal sensor and light will yeild improved visibility, subject to the actual conditions during operation.

Thermal unit

Camera core type	FLIR (uncooled longwave thermal imager)	
Lens	25mm*1	
Field of view	13x10 degrees (25x20 degrees for 640 core)	
Video output	Analog Channel Composite Video (Male RCA connector) PAL (Standard), NTSC. To change the video standard, see section 3.SET CAM VIDEO STANDARD	
Camera type	FLIR Tau 2, 336 (standard)	FLIR Tau 2, 640 (optional)
Detector resolution	336x256, 17µm	640 × 512, 17µm
Video resolution	640 × 480 (NTSC);	640 × 512 (PAL)*2
Refresh rate	25 Hz (PAL), 30 Hz (NTSC)	
Detection man/vessel	800m / 2000m	
Recognition man/vessel	200m / 550m	
Identification man/vessel	100m / 300m	

**1 Other lens types available upon request*

**2 Tau 336 & 324 analog video is upsampled & interpolated to 640 × 480 for NTSC, and to 640 × 512 for PAL*
